

Cap-Brulé's New Wastewater Treatment Facility

PROJECT UPDATE No. 35, June 2026

"The Dunes" approach concept
by Acre Architects Inc.

Construction of the Headworks Building:

- Completed major building works, including the Headworks floor construction, interior slab pours, masonry clip installation, and completion of various interior block walls.
- Advanced building envelope and roofing activities, such as the exterior membrane installation, skylight framing and glazing, gutter drain installation, and coordination of rooftop mechanical and electrical penetrations.
- Continued mechanical, electrical, and plumbing installations, throughout the facility.
- Progressed site safety, inspections, and project readiness activities for major equipment installation.
