

Cap-Brulé's New Wastewater Treatment Facility

PROJECT UPDATE No. 36, July 2026

"The Dunes" approach concept
by Acre Architects Inc.

Construction of the Headworks Building:

- Advanced structural works, including completion of the mezzanine steel structure and concrete slab, while masonry activities neared completion.
- Progressed roofing and building envelope works, including skylight installation, roofing activities, siding installation, and exterior wall insulation.
- Continued mechanical and plumbing installations throughout the facility, including process piping, ductwork, and equipment within the wet well.
- Achieved key progress on process equipment installation, including placement of the headworks screening equipment within the building.
